 <p>B-10-001</p>	One Of Them	DVD	Freedom from bullying, name-calling and violence motivated the high school seniors in this school-based drama. Jamie is shocked when she and her best friend become victims of homophobic name-calling. But she must face up to her own reactions as she realizes that her friend is “one of them” and needs her support. And Jamie’s boyfriend must decide if he will support Jamie. Set firmly in the context of human rights and freedom from discrimination, One of Them raises the questions that high school students talk about in school halls and washrooms. With a focus on homophobia and discrimination, not sexual behavior, the dramatization prompts viewers to examine their own responses and promotes a safe school environment for all students.  SJ-10-005	Tapped Out The World Water Crisis	DVD/CD-ROM	The impact of globalization and the privatization of water. Clearly, water quality and availability is of growing concern for people throughout the world, including Canada. The current common Threats resource introduces and explores many of the international debates which surround water. IS water a commodity or a human right? Should it be managed privately or publicly? What are the current and future environmental threats to water?	
 SJ-10-001A-D	Hungry For Change	DVD/CD-ROM	'I'm hungry.' As a complaint, a demand or a simple statement, this short phrase articulates the most simplest of our basic needs. The issues surrounding food, however, are anything but simple. Around the world, as the number of mouths calling out to be fed continues to increase, the way in which we grow, distribute and consume our food is becoming more complicated. No longer simply growing and eaten, food is now produced, designed, engineered, analyzed, graded, packaged, marketed, and politicized. Food has become a topic to be studied and a commodity to be traded. It has become a tool to be manipulated by an ever demanding economy-a means to further divide the haves from the have-nots.
